ABOUT US

Golden Paints was established in Jordan in 2009 and is a leading manufacturer of high-quality paints and coatings. With over **30 years** of industry experience. Operating on facility **100,000 square meters**, the company specializes in the production of automotive, architectural, wood, industrial and solvent and powder coatings. With an annual production capacity of nearly **20,000 tons**, **Golden Paints** exports to over **33 countries** across the World. The company has established itself as an industry leader through innovation, a strong commitment to quality, and a focus on delivering exceptional customer service.

ABOUT US

Golden Paints offers a comprehensive system for furniture, doors, kitchens, and interior woodwork. The system includes filler, primer, sealer, lacquer, color, thinner, and Linseed Oil finish, ensuring smooth, flawless surfaces, vibrant color, and long-lasting protection for your wood. Achieve professional results and a luxurious, durable finish with every project.

Wood Putty

NC Putty:

Nitrocellulose-based wood putty for filling surface defects. It is used to fill nail holes, joints, small cracks, and minor surface imperfections in wood, providing a smooth, even surface before primers, sealers, or top coats are applied. It is sandable and compatible with NC and PU systems when used correctly.

**GOLDEN
PAINTS**

Primers

NC Primer (White / Grey / Yellow Oxide)

Nitrocellulose primer for wooden substrates, available in White, Grey, and Yellow Oxide. It improves adhesion of subsequent coatings such as sealers, lacquers, and paints, helps level minor surface irregularities, and unifies the substrate. Grey and Yellow Oxide shades offer flexibility for specific color systems and hiding requirements.

**GOLDEN
PAINTS**

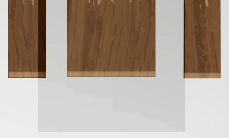

PU Primer - White:

Polyurethane (PU) white primer for high-performance wood systems. It provides excellent adhesion and build with good sanding properties, creating a solid, uniform base for PU lacquers and PU top coats. Suitable for doors, furniture, and wood surfaces that require higher durability.

**GOLDEN

Sealers

NC Sealer:

Nitrocellulose sealer used as an intermediate coat on wood. It closes wood pores, regulates absorption, and provides a smooth, sandable surface to prepare for NC lacquer or NC paint. It enhances the overall finish and helps achieve an even and consistent top coat.

**GOLDEN
PAINTS**

PU Sealer:

Polyurethane sealer for premium wood finishing systems. It offers higher hardness and better chemical resistance than standard NC sealers, ensuring excellent adhesion between primer and PU lacquers. It is used where durability and resistance to handling, stains, and cleaning are required.

Lacquers

**NC Lacquer (Matt 10 % ,Semi Matt 25%,
Semi Gloss 50 % , High Gloss 100%):**

Nitrocellulose clear lacquer available in multiple sheen levels: Matt 10%, Semi Matt 25%, Semi Gloss 50%, and High Gloss 100%. It is fast drying and easy to apply by spray, suitable for interior furniture, doors, and decorative woodwork, with a choice level of gloss to match the desired visual effect and feel.

**GOLDEN
PAINTS**

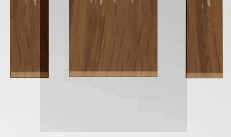

PU Lacquer (Matt 10 % ,Semi Matt 25%, Semi Gloss 50 % , High Gloss 100%):

Polyurethane clear lacquer available in the same sheen levels: Matt 10%, Semi Matt 25%, Semi Gloss 50%, and High Gloss 100%. It offers higher hardness and abrasion resistance compared to NC lacquers, as well as better resistance to household chemicals and frequent cleaning. Ideal for tabletops, kitchen cabinets, and wood surfaces subjected to heavy use.

**GOLDEN
PAINTS**

NC Paint

NC Paint - Solid Color:

Nitrocellulose solid color paint for wood, providing perfect color with smooth coverage. It is suitable for interior wooden furniture, doors, and decorative elements where a uniform color finish is required.

**GOLDEN
PAINTS**

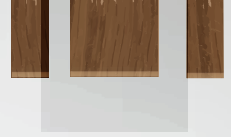

NC Paint - Metallic Color:

Nitrocellulose-based metallic paint for decorative wood applications. It adds metallic visual effects to special design pieces and is used for modern or accent elements that require a distinctive look.

**GOLDEN
PAINTS**

NC Paint -Special Colors:

A range of nitrocellulose paints formulated for Special Colors. It is intended for projects that require particular colors for branding, design concepts, or project specifications, and can be matched to standard charts or custom references as needed.

**GOLDEN
PAINTS**

Thinners

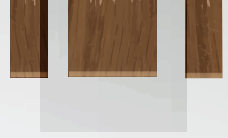

NC Thinner:

Special thinner for NC wood systems, used to adjust viscosity for spray or brush application. It helps improve flow, leveling, and finish quality of NC primers, sealers, lacquers, and paints when used at the recommended ratios.

**GOLDEN
PAINTS**

PU Thinner:

Dedicated thinner for PU primers, sealers, and lacquers. It ensures correct application viscosity and pot life for PU systems, supports proper film formation, and helps avoid defects such as orange peel or poor leveling.

**GOLDEN
PAINTS**

Linseed Oil:

Linseed Oil:

An ideal solution for treating and protecting wood surfaces, designed to penetrate deep into the fibers to nourish the wood and prevent drying. It enhances the wood's inherent grain, providing a warm, classic aesthetic with essential protection. This versatile oil can be applied as a standalone finish for a refined look or as a foundational primer in traditional wood coating systems before applying wax or additional protective layers.
